Functional Group=HC

Purpose: This X12 Transaction Set contains the format and establishes the data contents of the Health Care Claim Transaction Set (837) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to submit health care claim billing information, encounter information, or both, from providers of health care services to payers, either directly or via intermediary billers and claims clearinghouses. It can also be used to transmit health care claims and billing payment information between payers with different payment responsibilities where coordination of benefits is required or between payers and regulatory agencies to monitor the rendering, billing, and/or payment of health care services within a specific health care/insurance industry segment. For purposes of this standard, providers of health care products or services may include entities such as physicians, hospitals and other medical facilities or suppliers, dentists, and pharmacies, and entities providing medical information to meet regulatory requirements. The payer refers to a third party entity that pays claims or administers the insurance product or benefit or both. For example, a payer may be an insurance company, health maintenance organization (HMO), preferred provider organization (PPO), government agency (Medicare, Medicaid, Civilian Health and Medical Program of the Uniformed Services (CHAMPUS), etc.) or an entity such as a third party administrator (TPA) or third party organization (TPO) that may be contracted by one of those groups. A regulatory agency is an entity responsible, by law or rule, for administering and monitoring a statutory benefits program or a specific health care/insurance industry segment.

Encounter Notes: *Error Message: REQUIRED CLAIM SEQUENCE NUMBER MISSING - TennCare sequencer is defined as the first subcomponent (NTE02-1) of the 2300 NTE02 where the NTE01 = ADD.*

Details: 2300 NTE02 is Required for TennCare.The ONLY allowed NTE01 qualifier is 'ADD'.HIPAA defined standard element of length 80. The edit parses the NTE02 when NTE01 = "ADD",from the beginning of the element until either the segment terminator or the pipe symbol "|" is encountered. If the pipe symbol is encountered, all bytes following it until the segment terminator are the claim note and all bytes prior to the pipe are to be considered the Processing Sequence Identifier. If no pipe is found then the entire contents are considered Processing Sequence Identifier (80 bytes).This is a SNIP 1 error.The SNIP 7 error will set when the NTE02 is missing. NTE02 where NTE01=ADD should start with the MCC Receipt Date.

Error Message: MAXIMUM NUMBER OF CLAIM DETAILS EXCEEDED - More Than 50 Details Must Indicate Paper Original CMS 1500 Form (2300/NTE02) .

Details: The limit for (837P) CMS1500 paper claim service lines is 99. The ONLY allowed NTE01 qualifier is 'ADD'. This data element is parsed when NTE01 = "ADD", from the beginning of the element until either the segment terminator or the pipe symbol "|" is encountered. The pipe symbol is used by TennCare to specifiy 'paper' in the NTE02-2 (value after the pipe). TennCare allows the MCCs to use NTE02 with a value of 'paper' to indicate that more than 50 detail lines may be present. 837P ONLY: If NTE02 contains the value 'paper', then the maximun allowed number of 2400 Loop service lines is '99'. Fail > 99 . Fail > 50 w/out 'paper'.

*Details: The edit applies to only the 2400 service dates in the 837P. If any 'from' service date (837P 2400/DTP03 where DTP01=472) is greater than the line adjudication date (2430/DTP where DTP01=573), then that date is in error. Flag the error at the 2430 DTP02.The DTP02 should be inspected and if the DTP02=RD8, then the Begin date (FROM-the first date in the date range) should be used for comparing against the Adjudication Date.For example, if the DTP segment looked like "DTP*472*RD8*20080911-20080922" the Service date would be "20080911".Adjudication Date edits apply only to the MCC loops.Edits do not apply to other payer loops.*
